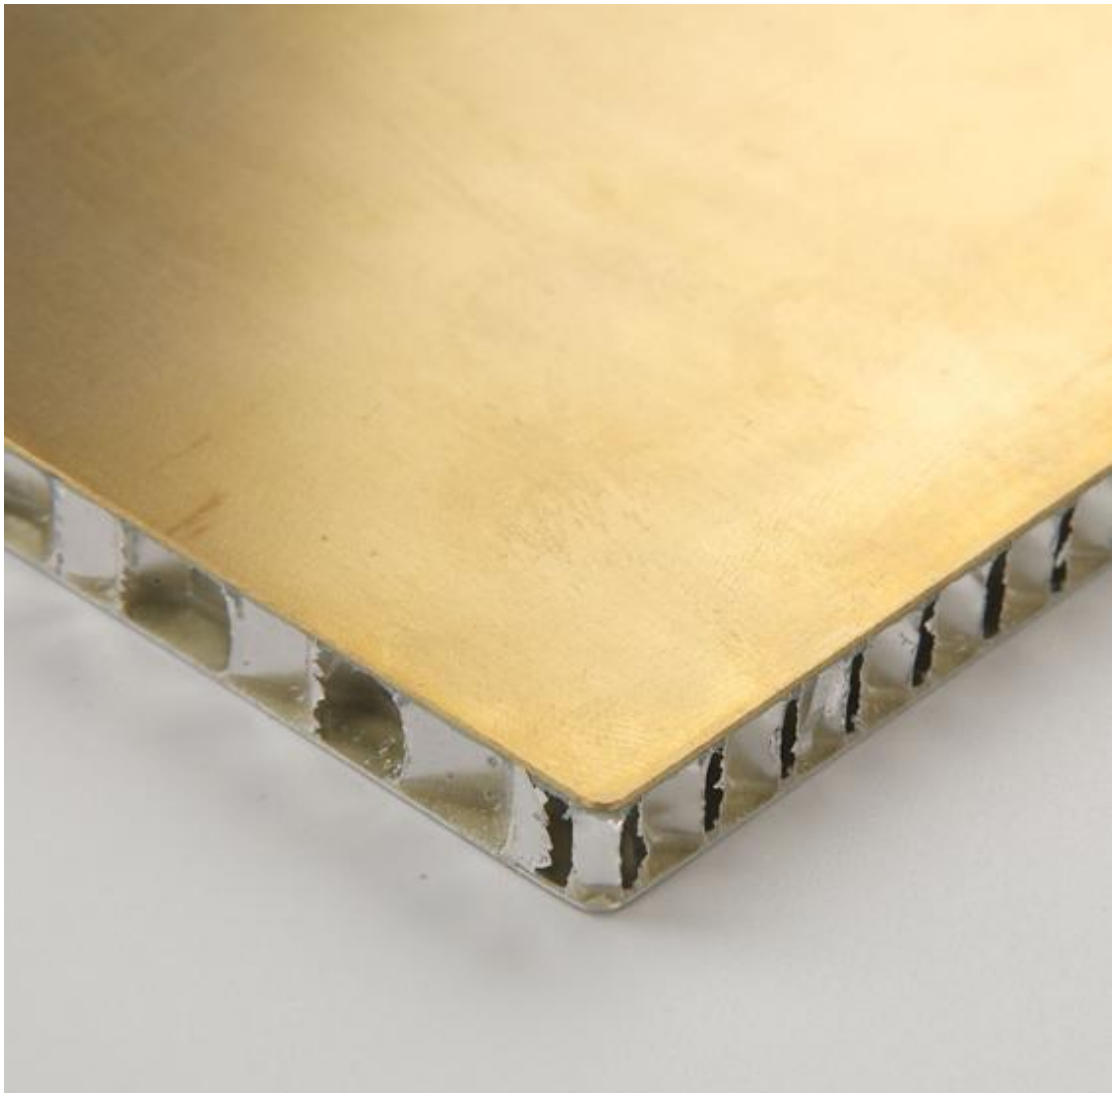
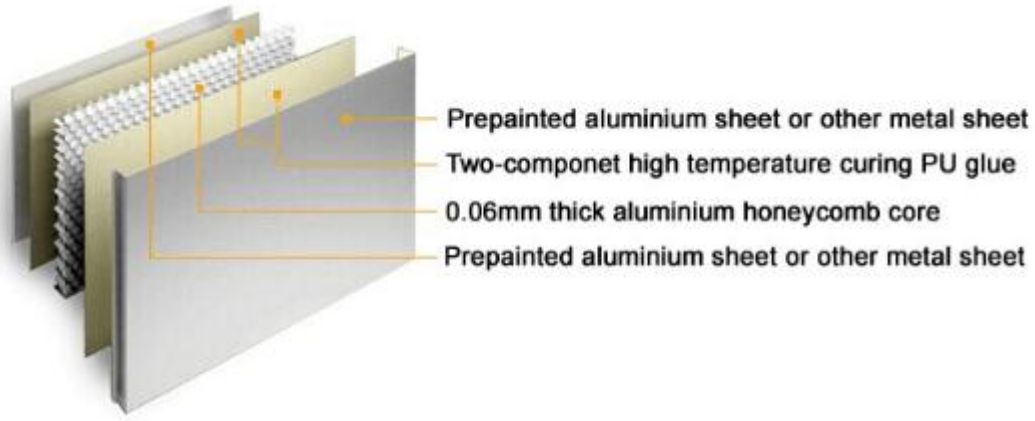
Aluminum Honeycomb Panel



Raw Material

Top Skin: Aluminum, Stainless Steel, Titanium Zinc, Copper
Core Material: anodized aluminum honeycomb
Bottom Skin: Aluminum



Prepainted aluminium sheet or other metal sheet
Two-componet high temperature curing PU glue
0.06mm thick aluminium honeycomb core
Prepainted aluminium sheet or other metal sheet

Characteristics of Aluminum Honeycomb Panel

- Large scale, up to 2100*12000mm
- Extremely low weight
- Excellent strength
- High resistance to moisture
- High resistance to corrosion
- Excellent thermal conductivity
- Noncombustible
- High resistance to fungi
- UV resistance
- Acoustic insulation
